

HOPE RISE FOR VULNERABLE COMMUNITIES UGANDA

WEAVING HOPE, STRENGTHENING LIVES & LIFTING GENERATION

Kirangira Namubiru-Nama Subcounty Mukono District

Email: hoperiseuganda@gmail.com Tel: +256778 576374

ABOUT US

Vision

Empowered communities living with hope, dignity, and a sustainable future.

Mission

To awaken, inspire, and empower vulnerable communities—particularly those living with HIV/AIDS—through locally driven solutions that improve health, education, self-help skills, and climate-resilient livelihoods.

Our Goals

- Expand access to quality healthcare and sanitation services for people living with HIV in the Kirangira community, enabling them to live healthier, dignified lives.
- Increase access to education for children living with HIV, teenage mothers, and out-of-school youth—helping them stay in school, build confidence, and realise their full potential.
- Empower vulnerable women, teenage mothers, and youth with practical skills and entrepreneurship training to strengthen their economic resilience and independence.
- Promote climate-smart practices to build resilient and environmentally responsible communities.

About US

HopeRise for Vulnerable Communities Uganda is a registered community-based organisation (CBO) dedicated to improving health, expanding access to education, strengthening livelihoods, and building climate resilience among vulnerable communities—particularly children living with HIV, women, and youth in Kirangira, Namubiru, Nama Subcounty, Mukono District.

Founded on the values of compassion, dignity, and hope, HopeRise exists to uplift individuals and families facing stigma, poverty, and social exclusion. We believe that sustainable change begins within communities. By working closely with local people, we transform everyday challenges into opportunities through local knowledge, action, and innovation.

Our community work is rooted in four interconnected thematic areas:

- **Healthcare Access & Community Sanitation (HACS) Program:** delivering and promoting dependable healthcare services and community sanitation solutions to improve hygiene among HIV/AIDS households and the most vulnerable.
- **EduSave Program** — reuniting out-of-school children with education, and providing sponsorship and mentorship, especially for children living with HIV (CLWH) and other vulnerable children and youth.

- **Self-Help Entrepreneurial Skilling & Livelihoods Development (SESLD) Program** — focusing on practical vocational training and self-help entrepreneurial skilling for women, teenage mothers, and youth to reduce unemployment.

- **EcoAdapt Program for Climate Adaptation & Environmental Sustainability** — building and promoting eco-resilient communities through climate-smart farming, agroforestry, and environmental stewardship.

Through these interconnected approaches these approaches, we walk alongside communities to create lasting, locally owned solutions that restore hope and transform lives.

Our journey

The journey of HopeRise began in 2019 following deeply personal encounters that shaped its foundation.

In February 2019, Mukasa Dennis, a fresh graduate, visited his 80-year-old grandmother in Kirangira, a remote area in Mukono District. During this visit, he encountered a single mother living with HIV/AIDS, raising five children, most of whom were also HIV positive. Only two were in school. Meals were scarce, and the family had been abandoned by the father, a truck driver. At times, none of the children were consistently in school.

The next day, together with his friend Senyonga Emmanuel, now Co-Founder, they returned with food and basic scholastic materials to support two of the children back to school. This was their first response, but it also exposed a wider reality in the community.

In the same year, as a Clinical Officer and a Biomedical Laboratory Technologist, they recognized a gap in access to affordable healthcare. They established Valentine Medical Centre to provide basic healthcare services to the most vulnerable.

In 2021, during a medical camp supported by Mr. Mike Leatherwood, a critical issue emerged. Nearly 80% of HIV/AIDS patients seeking treatment, mainly for malaria and TB, were not adhering to their ART regimen. Further engagement revealed the reasons. Many lacked food, faced stigma, and had limited access to counselling.

They then identified three of the most vulnerable households and began walking closely with them, providing healthcare, nutritional support, and counselling to improve ART adherence.

As this work continued, it became clear that the health challenges were rooted in deeper economic realities. Many families survived by digging and selling stones. A 10-litre bucket sold for about \$0.3, meaning one had to dig more than three buckets to earn \$1. Others depended on cutting down trees for charcoal, leading to environmental destruction around their homes.

At the same time, HIV-positive mothers struggled to feed their families and had no stable source of income or practical skills. Many boys were out of school and engaged in

casual labour, while some ended up in nearby Wantoni slums, where crime and drug use were common. Many girls were forced into risky survival activities along the Wantoni streets, often targeted by truck drivers.

At this point, it became clear that health, poverty, and environmental challenges were interconnected. Each visit revealed the same pattern, and one thing stood out clearly. The community was losing hope.

We reflected on what we were seeing and asked ourselves what was needed most. If there is anything worse than being trapped in a vicious cycle of vulnerability, it is the loss of hope.

We agreed on one simple statement, ten words that would guide everything that followed:

“We can help them breathe hope so they can dream again.”

“These ten words became the turning point.”– They moved us from small, informal acts of support to a more deliberate and structured response. From that moment, we committed to restoring hope and helping communities rebuild their lives.

This led to the formal registration of HopeRise for Vulnerable Communities Uganda as a community-based organization, allowing us to streamline our interventions and respond more effectively to the interconnected challenges of health, education, livelihoods, and environmental resilience.

Today, HopeRise supports vulnerable families, children living with HIV, women, and youth through healthcare access and sanitation, education sponsorship and mentorship through the EduSave Program, self-help entrepreneurial skilling, and climate resilience.

Our Journey of Impact

Early 2019 – 2021

HopeRise began with one household supporting a family of 7 children living with HIV in Jinja. By September 2020, this had grown to over 3 households and 15 children under our care, which led to our formal registration in 2021. With over 7 households and 25 children, HopeRise provided food relief, healthcare, and nutritional support to vulnerable families during COVID-19. We also worked to reunite out-of-school children with their homes and back to school.

2022 – 2023

Through Valentine Medical Centre and partners, HopeRise organized 2 medical camps for screening non-communicable diseases, treated common conditions, and performed 15 minor surgeries. We supported 30 vulnerable children living with HIV through school fees and scholastic materials at primary level, in partnership with Gemstone Primary School, with support from Mr. Mike Leatherwood.

2024 – 2025

We introduced self-help skilling in craft shoe making and trained over 20 teenage mothers who had dropped out of school, enabling them to earn income and support their children. We continued supporting children living with HIV and orphans with education, food, and healthcare. During this period, we reunited 20 individuals back to ART treatment and conducted over 7 counselling programs to address stigma.

2025 – Present

With support from partners including EduSenga (Makerere University), the European Union through the Global Youth Mobilisation Youth Empowerment Fund, and the Winnie and Gabriel Tumwine Foundation, we launched the EduSave mentorship program. This program supports students to stay in school, build life skills, and develop entrepreneurship capacity. It also promotes girl child education and inclusion in leadership and decision-making. We have so far partnered with 6 schools, reaching over 1,500 students.

Through our self-help skilling program, we have trained 100 community members (50 women and 50 youth aged 20–29) in practical poultry farming as a sustainable alternative to quarrying, deforestation, and risky survival activities.

In climate adaptation and resilience, we are implementing agroforestry through our EcoAdapt Gardening model. We have established over 5 household gardens and 3 in primary schools, and conducted training in organic farming using locally made biofertilizers and organic pesticides.

Today

From one encounter with poverty and stigma, HopeRise has grown to support over 90 children, 80% of whom are living with HIV, across more than 30 vulnerable households through education, healthcare, and livelihood support.

Our team has grown to 8 members, supported by over 15 community volunteers. This journey continues, and we remain committed to being a light for the most vulnerable who need it most.

Message from the Founding Director

We extend our deepest gratitude to our donors for your unwavering support. Your generous contributions have truly transformed the lives of vulnerable children and women, particularly those living with HIV. Without you, our mission would not be possible.

Thank you for being an integral part of our community. Together, we look forward to making an even greater impact in the coming year.

A special and heartfelt appreciation goes to Mr. Mike D. Leatherwood for being an outstanding champion of our cause. Your generosity inspires us, and your support means everything to us.

Lastly, to our incredible team, partners, and the Kirangira community, your tireless dedication to improving the lives of vulnerable communities is nothing short of remarkable. May the Almighty God reward you abundantly for your hard work and compassion.

To our volunteers, you are our champions of hope. I always remind you of the quote by Elizabeth Andrew, "Volunteers do not necessarily have the time; they just have the heart." We are always moved by the time you give to HopeRise, and all I can say is, "Thank you for having the heart."

Dennis Mukasa

Director, HopeRise

Message from the CoFounder and Treasurer

As we reflect on our journey, there is much to celebrate. With your support, our community has shown strong potential to transform socio-economically and live healthier, more hopeful lives while becoming more conscious of the environment.

Children who once lived in fear due to HIV now face the future with confidence. Vulnerable mothers are becoming economically empowered and making decisions that shape their homes and livelihoods. Our community is steadily embracing hope and climate resilience.

Thank you for your generous support.

At HopeRise, accountability remains one of our core pillars. Every support we receive directly reaches the community and transforms lives.

At HopeRise, we believe that to care is to act.

Emmanuel Senyonga

Co-Founder and Treasurer

OUR WORK-WHAT WE DO

At HopeRise for Vulnerable Communities Uganda, we address the most pressing challenges that hinder community growth, self-actualization, and socio-economic and environmental resilience.

We identify opportunities within local challenges by developing community-based solutions, guided by local knowledge and action, blended with sustainable innovation.

Our work is organized under four thematic priority areas:

1. Healthcare Access & Community Sanitation (HACS) Program

At HopeRise, we believe that access to quality healthcare is a basic human right for every child and adult. Yet in the Kirangira community we serve, many vulnerable families face barriers such as limited medical facilities, high healthcare costs, and low awareness of preventive care. As a result, many remain exposed to preventable illnesses, malnutrition, and serious health complications.

Through our community clinic, Valentine Medical Centre, we provide healthcare and medical support to the most vulnerable. We particularly work with families with adults and children living with HIV/AIDS, supporting them through counselling for adherence and reuniting those who have dropped off treatment back into care through our partner hospitals.

Our services include testing for malaria, typhoid, TB, and brucella, as well as monitoring vital signs such as blood pressure, organ function, and maternal care. We treat mild and moderate conditions and perform minor surgeries, including cases related to domestic violence.

We also conduct regular medical outreach programs, bringing essential healthcare services closer to those who need them most. These include medical check-ups,

treatment for common illnesses, child immunisation, family planning services, and general clinical care.

We place strong emphasis on health education. Families are equipped with knowledge on nutrition, hygiene, maternal health, and disease prevention to improve their overall well-being.

For many children living with HIV/AIDS, access to healthcare determines whether they stay in school and thrive. For parents, it provides the strength to work and support their families.

We also recognize that sanitation is an integral part of preventive healthcare. Through partnerships with Village Health Teams (VHTs), we provide WASH training to promote hygiene and reduce infectious diseases at household level.

With continued support, we aim to expand and equip our community clinic to reach more underserved populations and provide more comprehensive care.

2. EduSave Program (Education Sponsorship and Mentorship)

At HopeRise, we recognize that education is one of the strongest foundations for transforming the future of vulnerable children and families.

Through our EduSave Program, we identify children living with HIV who are not enrolled in school, those who have dropped out, and those at risk of dropping out. We work with nearby government schools to support their return to school by providing fees and essential scholastic materials such as books, pens, shoes, and bags.

We also provide psychosocial support to help children overcome stigma and build confidence to pursue their life goals.

In addition, we advocate for girl child education and inclusion in leadership as a pathway to inclusive development.

Through partnership with EduSenga of Makerere University, we conduct school-based mentorship programs covering personal hygiene, life goal setting, academic preparation, and mental health awareness.

Recognizing the importance of reproductive health, we conduct menstrual hygiene awareness programs and train girls to make and use reusable sanitary pads. We also conduct awareness sessions on cross-generational relationships and their risks.

Students are organized into “EduSave Champions” groups under the motto “Each One, Support One.” We also integrate entrepreneurship, particularly in agribusiness, and environmental awareness into our mentorship.

Through this program, we nurture responsible, informed, and confident young people under the theme “Empower them to lead tomorrow.”

3. Self-Help Entrepreneurial Skilling & Livelihoods Development (SESLED) Program

At HopeRise, breaking the cycle of poverty requires more than short-term support. It requires equipping individuals with practical skills to build sustainable and independent livelihoods.

Many young people, women, and families in our community face unemployment, limited economic opportunities, and a lack of marketable skills. Without intervention, many turn to unsustainable livelihoods such as quarrying, deforestation, risky casual labour, and survival-based activities along Wantoni streets.

Through our Skills Empowerment Program, we provide hands-on training in carpentry, tailoring, hairdressing, and craft shoe making. These skills create immediate income-generating opportunities, especially for school dropouts and teenage mothers.

Beyond vocational training, we promote entrepreneurship, financial literacy, and community-based income initiatives. This ensures that participants are equipped not just to work, but to grow, innovate, and sustain their livelihoods.

This program restores dignity, builds self-reliance, and renews hope. With continued support, we aim to expand access to modern training tools and reach more vulnerable individuals.

4. EcoAdapt Program for Climate Adaptation & Environmental Sustainability

At HopeRise, we understand that a healthy environment supports healthy lives. We work to build community resilience in the face of climate change through practical and locally driven solutions.

Through our EcoAdapt Program, we restore greenery around homes using agroforestry. Community members are trained to establish integrated home gardens that combine fruit trees, medicinal plants, ornamental herbs, and vegetables. These gardens improve nutrition, generate income, and support environmental restoration.

So far, we have established over 5 household gardens and 3 in primary schools, with growing community adoption.

We also address waste management. For biodegradable waste, we train communities to produce biogas for clean cooking and biofertilizer for farming. For plastic waste, we integrate recycling into craft shoe making and other products, reducing pollution while creating income opportunities.

In addition, we promote climate-smart agriculture through organic farming practices. Communities are trained to grow crops such as bananas, maize, beans, cassava, vegetables, and fruits using organic manure and locally made pesticides.

These efforts improve food security, household nutrition, and income while reducing environmental impact. By involving communities in every stage, from planting to harvesting, we promote ownership, self-reliance, and resilience.

Our goal is not only to feed families, but to build sustainable livelihoods and protect the environment for future generations.

OUR IMPACT SO FAR

Healthcare Access & Community Sanitation (HACS) Program

- 30+ children living with HIV identified and reinstated to ART treatment
- 50+ households trained in WASH and sanitation practices
- 5+ medical camps organized
- 700+ community members reached with free medical services

EduSave Program (Education Sponsorship and Mentorship)

- 60+ vulnerable children supported (80% children living with HIV – CLWH)
- 6+ schools reached
- 2,000+ students mentored

Self-Help Entrepreneurial Skilling & Livelihoods Development (SESLD) Program

- 40+ families trained in poultry entrepreneurship
- 70+ individuals trained in vocational skills

EcoAdapt Program for Climate Adaptation & Environmental Sustainability

- 15+ EcoAdapt gardens established in the community
- 3+ tonnes of plastic waste upcycled into crafts and decorative products
- 9+ tonnes of biowaste converted into biofertilizer
- 300+ community members trained in climate-smart farming and organic gardening

Coming Soon

Graphical presentations will provide a closer look at the impact behind these numbers—from lives reached to milestones achieved.

SOME OF OUR IMPACT STORIES

We share a journey we have walked with Nazziwa Josephine and her sibling–Emmanuel and still counting! Across many thematics of our operation, we have many of these transformative stories.

Description	Picture/ Images
When we met Josephine’ mother, Josephine was just Eight years old living with her single mother of 2, in a rented single room in Kirangira. On the Monday morning, when we met her mother–Alone, without family or support, her future looked uncertain. She was supporting her family through quarrying stones; to get them food, clothes and basic health care–she barely afforded school fees as she earned less than \$1 perday. This young dream stayed home, seeing friends going to school. Hope had been lost!	 Initial encounter of the HopeRise Director with Josephines Mother.

We visited Josephine's family to offer immediate basic need support and food relief. On this day, we asked Josephine why she wasn't at school, she quietly replied "At school, I always feel embarrassed when I don't have things like a pen or a mathematical set. My teachers sometimes use me as an example, of fees defaulters while fellow students laugh at me because of my health and appearance. At night, I cannot do my assignments because we have no light. I also feel hungry in class, and it is hard to take my medicine like that. But when I stay home, I feel better. At least we eat at the quarry site when we escort Mum. But I would love to go to school". Thanks to the support by Mr. Mike Leatherwood under the HopeRise Education sponsorship program, we prepared Josephine and her young brother-Emmanuel to start school. We provided scholastic materials to them and next day enrolled them in school. Back home food relief ensured they never slept on hungry stomach.

Next thing Josephine and Emma were enrolled in school under support of HopeRise Education sponsorship program. Despite Josephine's early life challenges, she has thrived. During her primary and secondary school, she loved playing volleyball and served as Head Prefect at all these levels, emerging as a promising young leader. Academically, she has been exceptionally ranked as the top student at her schools. She emerged the best student in primary national exams and second best in the UCE exams in Mukono district.

As Hopersie, we are proud to have walked along Josephine and other vulnerable children. This has always been through continuous school support, school visits for mentorship. To us, Josephine is an inspiration how kind acts can transform lives of those most in need-We are always counting on this inspiration to support more young minds to dream and realize their life goals.

Through the encouragement of HopeRise and our sponsors, Josephine has now completed her UCE And now enrolled to do Nursing course. Her dream was to be Nurse help vulnerable mothers access fair and just maternal care! We can't wait for what the future holds! Josephine's childhood dream, once lost is being realized.

Emanuel is finishing his primary seven and geared to start secondary school next year, 2027.

GET INVOLVED- How You Can Support

We welcome all meaningful ways to partner with us and make a lasting impact in our communities:

- **Medical Access and Sanitation**
Support children and adults living with HIV to regain and adhere to ART treatment. Contribute to community medical camps or provide WASH materials to vulnerable households.
- **Child Sponsorship**
Support children living with HIV to stay in school by providing scholastic materials and paying school fees.
- **Support Self-Help Skilling**
Empower vulnerable mothers, youth, and teenage mothers through skills training, resources, and financial support to improve their livelihoods.
- **Climate Adaptation and Environmental Conservation**
Support training in EcoAdapt homestead gardens, plastic upcycling, and organic farming through knowledge sharing, financial support, or provision of improved seedlings.
- **Volunteer**
Contribute your time and skills to help us expand our reach and strengthen our impact.
- **Share Our Story**
Help spread the word about our work and the change happening in our communities.
- **Fund a Project**
Explore our Wishlist and support a project that aligns with your interests.
- **Sign Up for Updates**
Stay informed about our programs, success stories, and upcoming initiatives by subscribing to our newsletter.

OUR WISHLIST

We continue to grow in response to community needs. The following priorities reflect urgent gaps that, with your support, can significantly strengthen our impact.

Expansion of Valentine Community Clinic — \$48,400

With access to affordable healthcare becoming increasingly limited, we are experiencing a growing number of community members seeking services at our facility. To meet this demand, we aim to expand from a clinic into a **Grade II Community Hospital**.

This expansion will include establishing specialised units such as a maternity ward (capacity of 25+ mothers at a time), an HIV/ART clinic, TB clinic, and a surgery department. We also plan to acquire a CT scan to strengthen diagnostic capacity.

In the laboratory, we aim to introduce a microbiology section equipped with a biosafety cabinet (Level II) and an autoclave for culture and sensitivity testing. We also plan to procure a clinical chemistry analyzer (COBA) for testing key biochemical markers, and upgrade the hematology section with a 9-part CBC analyzer.

This will require both physical expansion through construction of additional wings and investment in essential medical equipment.

Organisation Van — \$10,000

Many of our activities require frequent travel into the community. Currently, we rely on hired vehicles to transport staff, volunteers, and supplies during monitoring visits, medical camps, sanitation drives, and field trainings.

This approach is costly and limits our reach, especially in remote areas that are difficult to access. Yet these are the communities that need us most—for training, distribution of scholastic materials, follow-up on ART adherence, and response to emergencies such as domestic violence and illness.

Acquiring a van will improve our efficiency, reduce operational costs, and allow us to respond faster and more consistently to community needs.

Community Water Borehole — \$3,350

Sanitation and hygiene remain a major challenge due to lack of reliable access to clean water. Many community members share water sources with animals or rely on open wells, exposing them to diseases related to poor hygiene and sanitation such as diarrhoea.

As part of our WASH interventions, we aim to establish a community borehole to provide safe, clean water for households and children. This will directly improve health outcomes and strengthen our sanitation efforts.

EduSave Program Support (Education Sponsorship and Mentorship) — \$6,700

Through our EduSave Program, we aim to support **30 children living with HIV in primary school and 25 in secondary school** to access and remain in education.

This support will cover school fees, provision of essential scholastic materials such as books, pens, shoes, and school bags, as well as structured school-based mentorship programs. These mentorship sessions focus on life skills, academic support, mental health awareness, and guidance to help students stay in school and succeed.

For many of these children, this support is the difference between dropping out and completing their education. It not only keeps them in school, but also builds confidence, reduces stigma, and opens pathways for a better future.

HopeRise Vocational Skilling Centre — \$35,800

Currently, we implement vocational training through partner centres located far from the community, which limits access and consistency.

We aim to acquire land and establish a community-based vocational skilling centre to serve as a central training hub. Through this centre, we plan to train and graduate at least 100 beneficiaries annually, including teenage mothers, out-of-school youth, and single mothers.

The centre will provide training in areas such as making exercise books, craft shoes, belts, traditional wear, and decorative items. It will be equipped with essential tools including tailoring machines, sewing machines, leather cutting machines, and raw materials.

We plan to acquire **7 tailoring machines (at \$256 each)** to strengthen our training capacity. This will improve product quality, expand market opportunities, and enable us to reach more young people with practical, income-generating skills.

This centre will not only be a training space, but a hub for practical education, innovation, and opportunity for those most in need.

Climate Adaptation and Environmental Sustainability — \$5,300

Climate change continues to disproportionately affect vulnerable households, especially through its impact on food security and income.

Our community generates significant amounts of biodegradable waste, which can be converted into organic fertilizer through composting. We aim to purchase **two community organic fertilizer machines** capable of converting biowaste into usable fertilizer within 36 hours.

This fertilizer will support our EcoAdapt programs, including agroforestry, homestead gardening, vertical gardening, and organic farming.

Through this approach, we aim to improve soil health, increase food production, and create income opportunities, while reducing environmental degradation.

By using local knowledge and practical solutions, we are turning waste into opportunity and building communities that are environmentally responsible and resilient.

VOLUNTEER WITH US

At HopeRise, as we continue to grow and extend acts of kindness to the community, we believe in teamwork and rely on volunteers. If you believe in our cause and are ready to support community change, we welcome you to join our diverse team.

Our volunteers are at the heart of our mission to transform lives and strengthen communities. We believe that lasting impact comes through collective effort, and we welcome individuals who are passionate about making a meaningful difference.

Volunteers play a vital role in supporting our programs. This includes improving access to healthcare, supporting education and mentorship for vulnerable children, promoting self-help entrepreneurial skilling for women and youth, and advancing environmental sustainability.

Whether mentoring children, assisting in educational activities, supporting community outreach, or contributing professional skills, every act of service moves us closer to our vision of a better future for vulnerable children and families.

Volunteering with HopeRise is more than giving time. It is an opportunity to inspire hope, share knowledge, and grow through service while contributing to sustainable community change. We are guided by compassion, commitment, and a strong sense of purpose, and we strive to create an environment where every volunteer can grow while making an impact.

Together, we can uplift communities and empower the next generation to reach their full potential.

[Become a Volunteer](#) (Clickable to take an applicant to a google form)

OUR VOLUNTEER POLICY

At HopeRise, we value our volunteers and recognize them as the heartbeat of our mission and vision. We deeply appreciate the time, skills, and passion you bring in helping us restore hope and dignity to children living with HIV, women, teenage mothers, and youth in our community.

If our mission aligns with your passion, we welcome you to join us and serve with integrity, respect, and empathy.

Life at HopeRise as a Volunteer

- We provide mentorship and leadership development, making volunteering an opportunity to grow as you serve.
- We offer a safe, inclusive, and supportive environment for all volunteers.
- We ensure that your time and effort make a meaningful contribution to the lives of the people we serve.
- We value transparency and open communication in all volunteer activities.

- HopeRise has zero tolerance for any form of sexual abuse. We expect all volunteers to respect one another regardless of gender, background, or religion.
- Volunteers are expected to dedicate at least 10 hours per month, either through virtual engagement or field-based activities.
- Withdrawal from volunteering is free and open. Upon official notice, volunteers who have served for at least one year are awarded a Merit Certificate and may receive a recommendation.

Expectations from Volunteers

- Respect the values, culture, and mission of HopeRise at all times.
- Maintain professionalism, integrity, and confidentiality in all interactions.
- Work collaboratively with staff, fellow volunteers, and community members.
- Be reliable and trustworthy. If you commit to a role or schedule, we count on you to honor it.

SHARE OUR STORY AND IMPACT

Spread the Word – Let Them Know

When you share our story and the work we do, you help create a bigger impact. We truly appreciate your support and generosity.

Talk to your friends, networks, and well-wishers about the work we do in vulnerable communities and the lives being transformed through HopeRise.

You can also turn personal moments such as birthdays, Christmas, Easter, Thanksgiving, Mother's Day, or Father's Day into opportunities for awareness and fundraising.

There is no single way to do this. Any style, format, or approach is welcome—as long as it shares the story, increases visibility, and supports a common cause. We are always grateful.

Some simple ways to get involved:

- Celebrate your birthday by inviting friends to donate instead of giving gifts
- Share our work with colleagues, workplaces, and your wider community
- Reflect on our story and impact during gatherings or special occasions
- Mobilize a small fundraising event in your church, school, or social circle

Every time you share our story, you help us reach someone new who may also choose to support our cause.

Your voice matters, and we deeply appreciate it.

Be part of this cause by spreading the word.
